Y2Q Summary Findings

The 2020 AAMC Y2Q (Year 2 Questionnaire) was completed by 192 UWSOM E19 students in late 2020 (70% response rate). This report compares UWSOM data with national averages, and % changes from the previous year's data. This year, E19 students indicated a high degree of satisfaction with the overall quality of medical education (91%) and with being fostered and nurtured in their development as future physician. Data associated with one of the school's priorities, student mistreatment experiences, were mixed: offensive sexist comments slightly decreased (12% vs. 15%, 2019); public humiliation as a mistreatment source increased (11% vs. 8%, 2019) and so did racially/ethnically offensive remarks/names (7% vs. 5%, 2019). Notable downward trends were in the school's preparation of students to communicate with people across diverse backgrounds (79% vs. 92%, 2019) and student assessment of faculty behaviors associated with respecting diversity (74% vs. 86%, 2019).
